

Tomato Time — Google Play (Production)

Guia para publicação na loja · Versão **1.1.0** (versionCode **3**) · **Grátis** · Março 2026
Developer: **TheStudio9** · Marca: Studio 9 · Package: com.studio9.tomatotime

Resumo: A app já existe na Play Console (teste interno anterior). Agora é fazer upload do ficheiro **tomato-time-v1.1.0.aab** em **Production**, confirmar ficha + políticas, e submeter para revisão Google (1–7 dias na 1.^a vez).

1. Ficheiros que vais receber (pasta play-store)

Ficheiro	Para quê
tomato-time-v1.1.0.aab	Upload na Play Console (Production release)
icon-512.png	Ícone da loja (512×512)
feature-graphic.png	Banner 1024×500
screenshots/ (5 imagens)	Capturas de ecrã do telemóvel
NOTAS.txt	URLs e contactos rápidos

Nunca partilhar / pedir: ficheiros de assinatura (keystore, passwords). Só o developer precisa deles para builds futuros.

2. Dados fixos para a ficha

Campo	Valor
Nome da app	Tomato Time
Categoria	Productivity
Preço	Free (sem compras in-app)
Email de apoio	hello@studio9medical.com
Website	https://studio9medical.com/tomato-time/
Política de privacidade	https://cristyyalbertyy-hub.github.io/tomatotime/privacy-policy.html
Package ID	com.studio9.tomatotime (não alterar)
Play Console	https://play.google.com/console

3. Passo a passo na Play Console

3.1 Confirmar preço grátis

Monetize → Products → App pricing → Free

3.2 Ficha da loja

Grow → Store presence → Main store listing

- Upload: icon-512.png, feature-graphic.png, screenshots (mínimo 2, recomendado 5)
- Colar descrição curta e completa (secção 4 abaixo)
- Privacy policy URL + email + website

3.3 App content (obrigatório)

Policy → App content — fechar todas as tarefas pendentes:

Formulário	Resposta
Content rating	Productivity / Utility — sem conteúdo sensível → Everyone
Target audience	13+ (ou conforme questionário)
Ads	No
Data safety	Não recolhe nem transmite dados; estatísticas só no dispositivo
App access	Funciona sem login
Health / News / COVID	No

3.4 Production release

1. **Test and release → Production → Create new release**
2. Upload **tomato-time-v1.1.0.aab**
3. Aguardar validação (alguns minutos)
4. Colar **Release notes** (secção 5)
5. **Review release → Start rollout to Production**
6. Escolher países/regiões
7. Submeter — revisão Google: tipicamente **1–7 dias**

4. Textos da loja (copiar para a Play Console)

Descrição curta (máx. 80 caracteres)

Focus in 25-min bursts. Your tomato travels 4 sessions to complete a journey.

Descrição completa (inglês — idioma predefinido da loja)

Tomato Time is a cheerful Pomodoro timer built around a simple idea: focus is a journey, not a countdown.

Instead of watching minutes tick down, you watch your tomato move forward – one step at a time – across four work sessions. Each session is 25 minutes, followed by a 5-minute break. Complete all four and you've finished a full 2-hour journey.

WHY TOMATO TIME?

Most Pomodoro apps look the same: a circle, a countdown, done. Tomato Time is different. Four horizontal tracks show exactly where you are in your cycle. Your tomato mascot changes mood as you work – focused, tired near the end, relaxed on breaks, and celebrating when you finish.

HOW IT WORKS

- Tap Go to start session I – your tomato begins its journey left to right
- Work for 25 minutes, then enjoy a 5-minute break
- Repeat for sessions II, III, and IV
- Finish all four sessions and breaks to complete one Journey
- Each completed work session counts as one Tomato in your Harvest

YOUR HARVEST

Track what you've accomplished in tomatoes, not hours:

- Today's tomatoes and journeys
- This week's progress with a 7-day bar chart
- Current streak and all-time totals

FEATURES

- Classic Pomodoro rhythm: 25 min work / 5 min break × 4 sessions
- Visual session tracks – always know which session you're in
- Friendly tomato mascot with moods that match your session
- 5 languages, dark mode, focus mode, countdown or count-up timer
- Harvest stats + export CSV/JSON – stored on your device only
- Optional sounds, haptics, and background notifications
- Free – no account, no ads

PRIVACY

Tomato Time stores your harvest stats locally on your device. No sign-up, no cloud sync, no ads.

Made with care by Studio 9. Published on Google Play by TheStudio9.

5. Release notes (Production v1.1.0)

Welcome to Tomato Time on Google Play!

- 4-session Pomodoro journey with visual tracks and tomato mascot
- Focus mode, dark theme, and 5 languages (EN, PT, FR, ES, IT)
- Harvest stats: daily count, streak, 7-day chart, export CSV/JSON
- Countdown or count-up timer – your choice
- Optional sounds, haptics, and background notifications
- Free – no account, no ads, your data stays on your device

6. Data safety (texto em inglês se pedirem descrição)

Tomato Time does not collect, transmit, or sell personal data. Session counts (tomatoes and journeys) are stored locally on the device only. No account, no analytics SDKs, no ads.

7. Checklist antes de submeter

- ☐ Dashboard da consola sem tarefas críticas em falta
- ☐ URL da privacy policy abre no browser (testar)
- ☐ Preço = Free confirmado
- ☐ Ficha com textos + imagens actualizadas
- ☐ AAB v1.1.0 carregado em Production
- ☐ Release notes preenchidas
- ☐ Rollout para Production iniciado

8. Problemas comuns

Problema	Solução
[Complete setup]	Fechar App content + store listing
Não deixa upload AAB	Políticas ou ficha incompletas
Version code already used	Pedir ao developer AAB com code maior
Privacy inválida	URL tem de ser HTTPS pública, sem password

Revisão demorada	Normal na 1.ª Production (1–7 dias)
------------------	-------------------------------------

9. Depois de aprovada

- Procurar «Tomato Time» na Play Store (publicado por TheStudio9)
- Link no site: studio9medical.com/tomato-time/
- Actualizações futuras: developer envia novo AAB + versionCode maior
